Exterior Door Offering

MASONITE FIRE-RATED/ADA/STC COMPLIANT

MASONITE FIRE-RATED

► Whether or not codes require fire-rated entry, enjoy the peace of mind that comes with knowing your home is more protected. Masonite offers 20 and 90-minute fire doors with the same on-trend architectural characteristics of our steel portfolio. Masonite runs extensive testing at the R&D center to ensure the most stringent fire-rated building codes are met.

► 20 or 90-minute fire-rating must be specified when ordering.

MASONITE ADA

► Masonite is proud to offer several door designs with 10" bottom rails. Complying with ADA (American Disabilities Act) standards the offerings are available in a number of steel and fiberglass designs to suit many styles of architecture. Masonite is continually creating new and innovative products that make every home more valuable and more enjoyable.

► Doors indicated as ADA eligible must be installed with ADA thresholds and ADA compliant hardware.

MASONITE STC

► Managing and containing sound transmission is becoming more popular in both residential and commercial construction. Doors can be an important component when attempting to reduce the noise that is either entering or exiting a room or building. STC (Sound Transmission Class) are measurements of a door's ability to reduce the transmission of airborne noise. Higher STC values represent better noise reduction.

► Acoustical performance based on wood frames and 5/8" compression weatherstrip.
► STC determined in accordance with ASTM E90.
